

Junaid Aslam

Passport: WE1849701 | **Work permit:** Italian, Portuguese | **Date of birth:** 21/08/2003 |
Nationality: Pakistani | **Phone number:** (+39) 3277766533 (Mobile) | **Phone number:**
(+92) 3101417850 (Home) | **Email address:** junaidaslam.muet@gmail.com | **LinkedIn:** [20sw084](#) |
GitHub: [20sw084](#) | **Address:** Strada Statale 17, No. 11, 67100, L'Aquila, Italy (Home)

ABOUT ME

Full-stack Software Engineer with four years of experience spanning independent client delivery and in-house product work, including 70+ freelance projects delivered across three regions and ten months building production fintech features at Troon Technologies. Skilled across backend (Node.js, Nest.js, Python/FastAPI, Java), mobile (Flutter, Dart), and databases (PostgreSQL, MySQL, Firebase), with hands-on experience in REST API design, Docker/Kubernetes deployment, and test automation (Selenium, Playwright). Currently completing an MSc in Computer and Systems Engineering (Italy, continuing at the University of Lisbon), building on a BE in Software Engineering. Comfortable owning a project end-to-end, from requirements through deployment and maintenance.

WORK EXPERIENCE

LAB INSTRUCTOR – FAST-NUCES, KARACHI CAMPUS – 31/07/2025 – 21/10/2025 – KARACHI, PAKISTAN

- Delivered programming laboratory instruction to 200+ undergraduate students across Programming Fundamentals, Object-Oriented Programming and Data Structures and Algorithms, designing practical assignments and assessment criteria aligned to the course outline.
- Mentored students in debugging, code structure and Git version control, lifting average lab assessment scores by 30% across the term.

SOFTWARE ENGINEER – TROON TECHNOLOGIES – 01/01/2025 – 22/10/2025 – REMOTE, PAKISTAN

- Led the development and migration of enterprise software applications to modern architectures.
- Designed and implemented comprehensive unit and integration testing frameworks to ensure system reliability.
- Managed and optimized SQL databases for performance, scalability, and data integrity.
- Deployed and maintained applications on cloud platforms including Microsoft Azure and Google Cloud Platform (GCP).
- Collaborated with cross-functional teams to streamline CI/CD pipelines and improve deployment efficiency.

SOFTWARE SPECIALIST – UPWORK – 20/04/2022 – 13/01/2025 – REMOTE, UNITED STATES

- Identified and resolved software issues to optimize performance and user experience.
- Managed overall business operations, including strategy, client relations, and project execution.
- Collaborated with teams to streamline workflows, improve efficiency, and drive business growth.
- Led the development and maintenance of software solutions, ensuring alignment with business goals.
- Oversaw technical documentation, ensuring clarity and accessibility for internal and external stakeholders.

SOFTWARE ENGINEER – BYTEWISE LTD. – 01/02/2022 – 30/04/2022 – ISLAMABAD, PAKISTAN

- Collaborated with stakeholders to define project requirements.
- Designed and implemented various architecture for scalable systems.
- Took part in the development of mobile applications using Java, Flutter, and XCode.
- Mentored fellow developers and conducted their code integrations into final Production Code.
- Integrated third-party APIs and services to enhance application functionality and user experience.
- Optimized database queries and performed data modeling to improve system performance and data integrity.

SOFTWARE DEVELOPER – INTRAPRENEUR – 01/11/2021 – 31/01/2022 – HYDERABAD, PAKISTAN

- Designed and developed scalable software solutions to meet client and business requirements.
- Collaborated with cross-functional teams to define system architecture and development roadmaps.
- Implemented efficient algorithms and optimized code performance for reliability and speed.
- Integrated APIs and third-party services to enhance application functionality.
- Conducted code reviews, debugging, and testing to ensure high-quality deliverables.
- Documented technical processes and contributed to continuous improvement of development workflows.

● EDUCATION AND TRAINING

26/07/2026 – CURRENT Lisbon, Portugal

MASTERS OF SCIENCE IN INFORMATICS Universidade di Lisboa

- Selected for Erasmus+ mobility to complete the second year of my Master's at Ciências ULisboa. Based in Lisbon and available across Portugal and the EU.

19/09/2025 – 20/07/2026 L'Aquila, Italy

MASTERS OF SCIENCE IN COMPUTING SYSTEMS ENGINEERING Università degli Studi dell'Aquila

- Two-year, 120 ECTS programme taught entirely in English. Coursework in distributed systems, software architecture, advanced algorithms and applied mathematics for engineering.

17/01/2021 – 12/12/2024 Jamshoro, Pakistan

BACHELORS OF ENGINEERING IN SOFTWARE ENGINEERING Mehran University of Engineering and Technology

- Completed a Bachelor of Engineering in Software Engineering with a strong foundation in software development, algorithms, databases, and software engineering principles. Developed practical skills through academic projects in web, mobile, and backend technologies, with experience in collaborative and agile development environments.

● TECHNICAL SKILLS

Languages

- Core Languages: C | C++ | Java | Python | JavaScript | PHP | Dart
- Full Stack & Frameworks: Vue.js | React | Flutter | Node.js | Nest.js | Symfony | FastAPI | Tailwind CSS | REST APIs | Microservices | Git | GitHub
- Databases & Storage: MySQL | PostgreSQL | Redis | Firebase | Cloud Firestore
- Cloud & DevOps: Docker | Kubernetes | Helm | AWS | CI/CD | Linux
- Testing & QA: Selenium | Playwright | Cypress | Pytest | TDD | SDET Practices
- Concepts: OOP | MVC | CRUD | API Integration | Authentication | Event-Driven Architecture | Agile/Scrum | Code Review | JIRA
- AI-Assisted Development: Cursor | Claude Code | Prompt Engineering

● PROJECTS

Dynamic Bluetooth Command Android App

Developed an Android application that dynamically generates user interfaces and command workflows based on permissions retrieved from a remote REST API. Implemented secure login, token-based session management, periodic permission synchronization, and automatic logout on session expiration.

Technologies: Kotlin, Android SDK, REST API, JSON, Bluetooth, Token Authentication.

Smart Parking System

Designed and implemented a console-based Smart Parking System in Java supporting parking slot reservation, payment processing, cancellation workflows, file-based persistence, and reporting. Developed an interactive booking flow covering user selection, slot selection, booking confirmation, payment, and receipt generation.

Technologies: Java, JSON, Design Patterns, Layered Architecture.

Sereni AZIMUT A/V Control Interface

Developed a responsive Vue.js 2 web application that simulates an audio/video control interface for the Sereni Elettronica AZIMUT system. Implemented multi-zone A/V management, source selection, remote-control actions, TV/ power controls, and settings management.

Technologies: Vue.js 2, JavaScript, SCSS, Responsive Web Design.

- ### IntelliFarm: Farm Supervision & Productivity Analysis Platform

Developed a farm management and productivity analysis platform aimed at centralizing agricultural operations and improving decision-making through data-driven insights. The project was designed to address inefficiencies in traditional land management and improve coordination between landlords and farmers.

Technologies: Flutter, Dart, Firebase, Data Analytics, Mobile Application Development.
- ### Pharmacy Management System

Developed a desktop-based pharmacy management application using Java and MySQL for managing pharmacy operations through a graphical user interface built with Swing and AWT.

Technologies: Java, MySQL, Swing, AWT, JDBC.
- ### E-Commerce Mobile and Tablet App

Developed a cross-platform e-commerce application for mobile and tablet devices using Flutter and Dart, with a Node.js backend and Firebase services.

Technologies: Flutter, Dart, Node.js, REST API, Firebase.
- ### Electronic Invoicing & Client Management System

Developed a web-based invoicing and client management system using Symfony and MySQL to support customer administration, invoice management, and business record organization.

Technologies: PHP, Symfony, MySQL.
- ### AI-Powered Fake Media Detection Tool

Developed a machine learning prototype for detecting potentially manipulated or fake media content using Python, TensorFlow, and Natural Language Toolkit (NLTK).

Technologies: Python, TensorFlow, NLTK, Machine Learning, Natural Language Processing.

- **LANGUAGE SKILLS**

Other language(s):

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
PORTUGUESE	A1	A1	A1	A1	A1
ENGLISH	C1	C1	C1	C1	C1
ITALIAN	A1	A1	A1	A1	A1

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

- **CERTIFICATIONS**

British Council
IELTS Academic

C1 Proficiency Certificate in English Language with Overall Band Score of 7.0

CPIA
Italian Language

A1 Proficiency Certificate in Italian Language

- **COMMUNICATION AND INTERPERSONAL SKILLS**

Soft Skills

• Adaptability | Problem-Solving | Attention to Detail | Time Management | Effective Communication
